NOTES & DEFINITIONS
Prepared: August 2016
* In 2008-09 the Vineyards Survey (census based) was replaced by the Vineyards Estimate (sample based). The reader should be aware that sampling error associated the Vineyards Estimate should be taken into account when comparing between the two methodologies
Average Value ($A/litre) is calculated on FOB value. Free on Board (FOB) value includes production and other costs up until placement on international carrier but excludes international insurance and transport costs.
Export data is based on wine shipped from Australia to the country of destination - in some instances, wine is then trans-shipped to other countries for consumption.
